

ACW-DEEP Corp.

The First Company in Asia to Specialize in PreViz

PreViz (Previsualization) is a new production process that can check production techniques and extract/resolve trouble spots during the planning stage of moving picture production by visualizing the content of the moving picture using three-dimensional computer graphics. PreViz can enhance the quality while shortening the production period and reducing the cost. This company is the first in Asia to specialize in pre-visualization and is expanding their services into moving picture productions such as movies and commercials.
