

# Data Science Consortium, Ltd.

## Generating New Values by Making the Most of Data

Data Science Consortium, Ltd. was established as an enterprise that explores and researches the environment necessary for efficient high-quality data analysis, and makes practical use of these research findings in the society. The company hopes to help further increase the value of precise data analysis utilizing research conducted so far, including DandD, which aims to unify data with its description, and TextilePlot, a high dimension data visualization software.
