About ASTEM CO.,LTD

Our company was established in 1992 as a sensor manufacturer. We have much experience working with research companies without manufacturing equipment and carrying out joint research with universities.

Company strengths

We are known globally for our near-infrared spectroscopy (NIRS) technology, researching and developing medical equipment using NIRS in collaboration with Japan's top medical institutions. We are proud to support brain health management through outreach activities that bring brain NIRS from researchers to general consumers.

Main products

Brain NIRS (Hb131S)

Tissue oxygen-meter "Toccare"
(medical device)
