## About Danway Corporation

Our corporation helps the disabled reach their true potential al by giving them the skills and techniques necessary to survive in their environment as well as instilling self – dependence and self confidence.

## Company strengths

ICT-Jig ,a computer software application that we developed, helps disabled and old people to create websites, designed to improve independence. It also helps people all around the world to communicate in a universal language. Every day we are providing support for disabled people, making our software easier to use, and building our education curriculum. Utilizing the know-how gathered since our inception, we have developed, operated and sold medical records detailing the ability and growth of people with disabilities in quantifiable parameters.

## Main products

**ICT-Jig** (software that helps disabled and old people to make websites)

Features:

What makes ICT-Jig different from other softwares is it's simplicity.

When logging in, instead of a password you can choose a combination of pictures. Also, the easy to use menus and options make creating and designing websites simple.
