## About Kyodo International, Inc.

Our company vision has remained unchanged since the company was established: to give our customers in every industry an advantage by selling them products that were not previously available, and/or that cannot be copied.

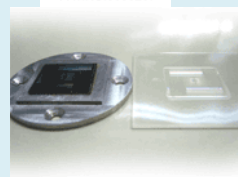

## Company strengths

We hold the top market share for dry ice blast precision cleaning systems, we started the first nanoprinting total foundry service in the world, and hold the top share for domestic Italian prosciutto imports.

## Main products

PAT.NO.3030287

### SUPERBLAST

An Eco-friendly cleaning system that utilizes dry ice and eliminates waste treatment.

The system, which uses unique technology, is ideal for precision cleaning.

### Nanoprinting technology

Cutting edge technology that uses semiconductor technology to create nano to micro level ultrafine molds, to transfer patterns onto resin.

We offer a complete package, from mold fabrication to transfer, and even engineering consultation.
