## About KYOKKO TSUSHIN SYSTEM CORPORATION

Since our inception 73 years ago, we have been self-developing emergency communications equipment to support transportation infrastructure such as railway and roads within Japan.

## Company strengths

Since our company was established, we have used our own unique technology to design, manufacture and sell wired telephones that can be used in emergencies.

## Main products

Dispatcher phone system

Telephone systems for railways, emergency telephones for roads, and emergency telephone systems that can be used in a wide range of environments, such as tunneling sites.

Railway line phone

Emergency phone system

Mobile Telespi (telephone system for audio calls)
