As Japanese businesses spread across Asia, there is a growing need for our waste disposal (recycling) technology in developing countries, and we receive many inquiries regarding environmental pollution.

Main business

We sell and dispose of industrial chemicals.

Company name - Masaki-sangyo Co.,Ltd

Inquiries - Hattori - tsutomu@masaki-sangyo.co.jp

About Masaki-sangyo Co.,Ltd

Our company was established as a precision machine work company in 1978. In 1982, a new waste disposal department was created. As time went on, to meet our clients' needs, we started to sell and dispose of industrial chemicals.

Company strengths

Unlike companies that only supply industrial chemicals, we both supply and collect the chemicals, making waste disposal easy for our clients. After cleaning, we recycle the waste and are able to raise the quality of the recycled chemicals to that of new chemicals, using our unique technology. This means we can provide used chemicals at a cheaper price, and pass these savings on to our customers.

Main products

Industrial chemicals (for various types of manufacturers)

Detergents (trichloroethylene, tetrachloroethylene, dichloromethane, etc.)

Recycled trichloroethylene, recycled tetrachloroethylene, recycled dichloromethane, recycled bromine etc., washer design and construction to maintenance.
