

Company Information

Field - Environment/Energy

Company Profile

URL - <http://www.maximum-tech.co.jp/>
Company name - MAXIMUM TECHNOLOGY Corporation
Established - August, 2006
Address - 510 East Kanagawa Science Park,
3-2-1 Sakado, Takatsu Ward, Kawasaki
Tel - 044-589-4511
Fax - 044-589-4512
Representative - Masao Makishima
Capital - 7,000,000 yen
No. of employees - 5
Overseas office - Currently in the planning stage
Current overseas business Exports
Prospective overseas business
Electric circuit design support for PTC thermistor customers.

Main business
We provide circuit design support related to the development, manufacture and sales of ceramic PTC thermistors and related modules.

Company name - MAXIMUM TECHNOLOGY Corporation

Inquiries - info@maximum-tech.co.jp

About MAXIMUM TECHNOLOGY Corporation

We are a spin-off company from a large specialized PTC manufacturer with over 20 years of PTC thermistor business experience. As well as mass producing PTC for car door mirrors, we also have many years of experience in PTC for over-current protection.

Company strengths

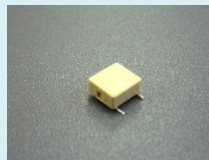

We create low-resistance PTC thermistors that are ranked highly globally based on barium titanate production technology using liquid-phase method that we developed. We also design related modules. All products are made in Japan and are of the highest quality.

Main products

Ceramic PTC thermistor

- For foldable mirror over-current prevention for cars
- For LED circuit over-current prevention

SMD chip PTC

Carburetor heater & Thermo-switch

- Car or motorbike carburetor and blowby gas anti-freezing cab heater (at the bottom of the picture)
- Thermo-switch that detects the outside temperature and turns cab heaters on and off (at the top of the picture)
