### About MATSUMOTO SEISAKUJYO

Our company was established in 1969. Our main business is plastic injection molding, and we also design and create molds. Recently we have been collaborating with large corporations, universities and administration to develop our own products, and plan and sell products. We have created our own brand: Aroma Les Frères See our website or search for "Aroma Les Frères" for more information.

### Company strengths

Our motto is "QCD + SS": Quality, cost and delivery, plus speed and service. We can also produce small lots and trial products. We mainly use polycarbonate plastic, but we can also use other materials, from all-purpose resin to materials that include super engineering plastic, and GF and CF plastic. We can also help develop products as well as manufacture them, allowing us to include value analysis and value engineering proposals in the early stages.

### Main products
