About NAGATSU PRECISION MOLD CO.,LTD.

We have been designing and manufacturing precision plastic molds since 1950. We create precision molds for optical devices such as digital cameras and projectors, OA and communications, automobiles, medical devices and the food industry.

Company strengths

We are good at making high precision, durable molds in difficult shapes.

We design molds using CAD/CAM/CAE, and create them using NC machines and our craftsmanship, meaning we can provide high quality molds. We provide a global business model.

Has connections with various overseas companies.
