About JAPAN HIGH SPEED BORING CO., LTD

We started deep hole boring in 1964. We were the first company in Japan to introduce this technology, and as a pioneer in the industry, for the past 50 years we have provided faster manufacturing technology and fulfilled many difficult requests. Furthermore, in order to adapt to various demands, we are pursuing even higher precision and quality.

Company strengths

From our years of experience of operating deep hole boring machines for the high speed boring technique, we have discovered many ways to improve, and through joint development with a head-cutter manufacturer, we have improved the efficiency and accuracy of deep hole boring, so we are the best in the business.

Main products

Deep hole boring machine
(BTA)

- BTA only
