Current overseas business

Focusing on China, we are looking into training for personnel who will work in Japan, making new partners and business contacts, and receiving tours for businesses in the Chinese elderly care industry.

Prospective overseas business

Matching Japanese businesses with those in Guangzhou, Xiamen and other places in China.

Sharing local caregiving information between businesses in Japan and China. Providing Japanese caregiving services to Chinese businesses.

Main business

Pharmacy, caregiving (group homes, day services, home-visit caregiving, home-based caregiving, assistive technology, etc.), welfare (support for disabled people, livelihood protection support, counseling about support for disabled adults, etc.), opening businesses and various types of consulting, research regarding caregiving, caregiving awareness programs.

Company name - Nihon Life Care Co.,Ltd.

About Nihon Life Care

Although we are a medium sized business, we have a group of 13 different community-based caregiving and pharmacy businesses, comparable to that of a large company.

Company strengths

Our main strength is the link between our pharmacies, group homes and home-based caregiving. We are strengthening our research and exchange of information with medical and caregiving businesses across Japan, and recently we have been contributing to the community with our end-of-life services.

Main services

- (1) Providing services linked with home-based caregiving/medical corporations (linked pharmaceutical and caregiving services)
- (2) Group homes for patients with dementia
