Current overseas business
Sales to automobile-related companies in Asia

Prospective overseas business
Globally there are not many measuring tools for spot welding available, so we want to promote and sell our products in America and Europe.

Main business
Manufacture and sales of measuring equipment for spot welding, and surveillance and security cameras.

Company name - MEKANO CORPORATION (SPOTRON CO.,LTD.)

Inquiries - Ishii (Welding marketing department) - E-mail: ishii@spotron.co.jp

About MEKANO CORPORATION

We are a research and development startup company that specializes in selling unique equipment under our own brand. Our motto is "Try to do what other companies do not".

Company strengths

We have years of experience as one of the few spot welding specialists in the world. We are leaders in measuring equipment in our field, and are far ahead of our competitors.

Main products

Electrode force gauge for spot welding SP-231 Series

This gauge makes it easy to measure electrode force in spot welding. It is portable and does not need a power source, but its simplicity does not impede its accuracy. It is a bestseller in the industry.

Ammeter for spot welding SP-3510

This ammeter can measure the current, voltage, weld time and waveform, and display the results on an LCD. Data can be saved to an SD card and output.
